Pool Safety Compliance Summary

AS 1926.1-2012: Safety barriers for swimming pools

Every TrueBatten™ fencing profile manufactured in Structural Grade aluminium by Batten Fencing Online has been independently strength-tested to **AS 1926.1-2012, Section 3 (Loading requirements for swimming pool safety barriers)** by a NATA-accredited laboratory. The reports summarised below cover every profile in the range, including angled and 90° corner configurations, and each configuration **complied with all applicable requirements** of the standard's test appendices.

PROFILE	CONFIGURATION	REPORT NO.	ISSUED	TESTED TO	RESULT
SlimLine 75 × 25	Straight panel	LP24-0571-01 Load Rev. 1	23/04/2024	AS 1926.1-2012, App. A & C	COMPLIES
SlimLine 75 × 25	45° panel	LP24-1289-01 Load	25/10/2024	AS 1926.1-2012, App. C	COMPLIES
BoldLine 80 × 40	Straight panel	LP24-1289-02 Load	25/10/2024	AS 1926.1-2012, App. C	COMPLIES
BoldLine 80 × 40	90° corner	LP24-1289-04 Load	25/10/2024	AS 1926.1-2012, App. C	COMPLIES
SquareLine 50 × 50	Straight panel	LP24-1289-03 Load	25/10/2024	AS 1926.1-2012, App. C	COMPLIES
RoundLine 38D	Straight panel	LP24-2455-01 Load Rev. 1	06/05/2025	AS 1926.1-2012, App. A & C	COMPLIES

ABOUT THE TESTING

All tests were performed by **LMATS Pty Ltd** (Perth Laboratory), accredited by NATA to ISO/IEC 17025 (Testing), **Accreditation No. 15840**. Test appendices cover strength and rigidity of barrier openings (Appendix A) and strength of pool fencing components, posts and footings (Appendices B & C).

FULL REPORTS & COUNCIL SUBMISSIONS

Complete NATA-endorsed test reports are available to councils, certifiers and project professionals on request for verification purposes. Contact us with your project details and we'll supply the relevant documentation for your submission.

Compliance of an installed barrier also depends on site conditions (heights, non-climbable zones, gate hardware). Your fence ships with the guidance needed to meet AS 1926.1 on site.
